MEMORANDUM FOR: Deputy Director of Central Intelligence
SUBJECT: Role of AFSPPPL vs. Eastman Kodak

1. This memorandum suggests that you sign the attached note to the DNRO.

25X1 2. The subject of the AFSPPPL budget came up at the 27 October EXCOM meeting and was subsequently established at the level of [Redacted]. During the discussion, Mr. McCone expressed E.K.'s concern that increased utilization of the Westover facility was aimed at ultimately replacing the present E.K. function. McMillan responded with a flat denial. On other occasions Mr. McCone has informally asked McMillan what Westover's part in the NRO processing picture was to be and McMillan has managed to sidestep the issue each time.

3. We are not championing E.K. in this matter nor are we questioning the AFSPPPL role. However, we are on record as expressing concern over the lack of sufficient information on which to base decisions regarding proper funding levels for Westover, and specifically Westover's role vis-a-vis E.K. While the attached cable sheds some light on the future role of AFSPPPL, it does not represent the definitive information necessary.

4. It is against this background that I recommend you sign the attached memorandum.

NRO review(s) completed.

Albert D. Wheelon
Deputy Director

MEMORANDUM FOR: Director
National Reconnaissance Office

SUBJECT: NRO Film Processing

1. The NRO now depends on the Eastman Kodak Company in Rochester, New York, and the Air Force Special Projects Processing Laboratory in Westover, Massachusetts, for processing of the film produced by most NRO programs. According to the memorandum of understanding regarding processing and reproduction of photography signed on 11 August 1962, the Eastman Kodak covert processing facility under CIA is to be utilized for processing all original negative materials, some film duplication, and R&D of new processing techniques for both laboratories. Westover is to be "utilized to produce duplicates for distribution to users."

2. In connection with the FY 1965 NRO budget review, it is necessary that this policy be reaffirmed or modified by joint agreement so that we can comment properly on your budgetary proposals. We have inquired several times about this area, but have received no clear response. This causes us some concern in view of your proposed annual report to the FFIAB which makes little distinction between the two facilities. We note further that an operational readiness inspection is to be held at AFSPPL in January, 1965, to demonstrate its capability "executing 'womb-to-tomb' processing of CORONA production at the earliest practicable time." Your several references to the "excessive" overtime at the Eastman Kodak facility is another indication that you may be proposing to recommend reconsiderations of the original distribution of responsibilities between EK and AFSPPL.
